

I know a lot of you will be very nervous to go into first year because that's exactly the way I felt. On my first day of S1 I was really nervous because I also missed some of the transition days. I was scared about getting lost but there will be S6's who will show you where to go for the first few days, then after that it's easier to remember where your classes are and there's lots of pupils you can ask. I was going up to high school with only 1 other person from my primary school, so I thought I would have no friends, but on the first day I made a few new friends, which made it much better going into school the next day. Everyday we start with registration which is where your registration teacher will take a register to see who is off, there is one day where you don't go to registration but you start off with an assembly. I think high school is much better than primary because there is more subjects to do and that makes it more interesting. S1 have a separate area to eat lunch and also have a separate playground where you can chat to your friends. I enjoy all the different classes but my favourites are French and Home Economics. If you have any worries you can go and speak to your guidance teacher or your head of year. I really enjoyed my first year at high school and I'm looking forward to second year.

Cullen, S2
